# MEASURE YOUR CHILD'S FEET

**Fold the line below.**

**Place your child's foot against the folded line of the paper up against a wall.**

### MOVE WITH THE RIGHT SIZE

It is important to measure your child's feet on a regular basis. Small feet grow fast and the shoe size can change from month to month. Children's shoes should generally be about 1-1.5 cm longer than the foot.

If in doubt, please ask your local MOVE by MELTON dealer for further advice.
